## Updated Freeway Digital

PowaKaddy's most successful trolley, the Freeway, has been modernised with a sporty appearance and digital makeover. The PowaKaddy Digital features a brand new soft-touch ambidextrous digital 'T' bar handle. A roller controller allows the trolley to be set at nine different speeds, so you can easily find the one for you. A new frame is inspired by the PowaKaddy Sport and is designed to be lightweight

and robust. The frame is combined with sporty low-profile wheels and a new battery tray that incorporates a built-in interchangeable battery connection that can be used with lithium and lead acid batteries. Available now, the trolley is available with a black or white frame. The RRP is £349.99 (18-hole lead acid battery), £379.99 (36-hole lead acid battery) and £529.99 (Lithium battery).
