

MAKE THE FREEWAY YOUR WAY

Powakaddy launch an impressive new family of electric trolleys – which model suits you?

POWAKADDY have launched three stylish and performance-infused models that herald the dawn of its world-famous Freeway franchise.

Renowned as the world's best-selling trolley for the past decade, the Freeway has been the recipient of a number of design and technology upgrades. The 2013 family comprises: a stylish new Freeway model, an enhanced Freeway Digital+ and the new Freeway Sport.

The latter has seen the critically-acclaimed PK Sport model rebranded to spearhead the all-encompassing new range. It will continue to spearhead the PowaKaddy range, providing golfers with myriad advanced technologies.

With unerring reliability, robust performance and sporty design features resonating throughout, the Freeway Family offers outstanding value throughout.

“Our reputation has been built on delivering quality, functionality, innovative technologies and performance across the board. We now aim to take these core values to the next level with the Freeway Family,” said John deGraft-Johnson, PowaKaddy's chairman.

(Lithium EBS & graphite frame)

Freeway Digital+
SRP: £429.99 with
standard lead acid
battery; £459.99
with extended range
battery; £579.99
with lithium battery

KEY FEATURES OF THE NEW FREEWAYS Four stand-out factors of the new, improved range

MODERN LOOKS

PK's designers have incorporated a new lightweight, oversized central tube and soft-touch ambidextrous T-Bar handle on the Freeway.

This delivers a more modern and sporty look. In addition, the innovative new Power on/off LED indicator and Pause & resume function provide additional performance capabilities.

QUIET MOTORING

The 200w whisper quiet motor ensures the Freeway Digital+ is not only visually stunning, but also engineered to the highest possible specifications for outstanding performance on all terrains.

It also boasts a lightweight and robust oversize frame. Combined with sporty low-profile five-spoke wide wheels, it has a modern look.

KEY LOCK SYSTEM

There's nothing worse than a bag and trolley combination which sees the former coming loose, or worse still, falling off just when you least want it to – generally as you try to navigate a bank to hack out your drive. A cutting-edge key lock system holds cart bags securely without twisting to ensure that will never be the case here.

HIGH-TECH FUNCTIONS

If you like your trolley packed with features, the Freeway Sport is the one for you. It has an innovative, but simple to use ergonomic soft-grip handle. This features an ambidextrous nine-speed control roller combined with an integrated LCD display screen and a separate button giving direct access to the Digital Distance Function.
