Updated frame and low-profile wheels are 2016 additions.

New display
That digital dash is packed with info - even your calorie consumption!

NEW TROLLEY #1

Powakaddy FW7S

Swanky new display unit even counts your calories!

Powakaddy has given its award-winning FW trolley range a complete revamp for 2016.

Plump for the top-of-the-range FW7S and you'll get an all-new, widescreen full colour digital display on the handle that's the size of a smartphone.

The screen gives all the usual distance and battery information, but for the first time thanks to a built-in calorie counter also tells you how many calories you've burnt during your round.

Other new features include low-profile

sports wheels and Powafame chassis and an upgraded, quieter 230W motor.

The popular FW5 (from £349.99 with standard battery, £499.99 lithium) and FW3 (from £299.99 with standard battery and £449.99 with lithium) have also undergone makeovers, with the addition of low-profile wheels, redesigned trims and new graphics for 2016.

Details: The new FW7S is available now, prices start from £429.99 (lead acid) and £579.99 (lithium). More information at www.powakaddy.co.uk

Easy to use
Three-way folding chassis system is simple to operate.
